COMPREHENSION QUESTIONS

1. According to Germanic mythology, what came before the world?
   Before the world, there was a great empty space called Ginnungagap in the place where the world is now. To the north of Ginnungagap was a land of ice and snow without life. To the south was an ice-free land of warmth and light.

2. According to Germanic mythology, how was the world created?
   Sunshine from the south melted the ice of the north, which fell into the gap and became the frost giant Ymir. Woden and his brothers killed Ymir, whose body parts became the world.

3. According to Germanic mythology, how was the earth made inhabitable?
   The gods took sparks from the land of light, making the sun, moon, and stars. The sun warmed the earth and life was born.
4. How is the world tree nourished?
   The roots of the world tree are fed by the Norns (Fates) with water from a sacred spring.

5. According to Germanic mythology, how will the world end?
   The frost giants will destroy the earth. There will be three terrible year-long winters; the sun and moon will fall from the sky; the earth will be shaken apart; the mountains will fall; the trees, including the world tree, will be torn up; the earth will sink into the sea.

6. How will a new earth be born?
   Heimdall's alarm will bring together the gods, who will defeat the frost giants. New earth will rise from the sea; forests and crops will grow; a new eternal heaven brighter than Valhalla will be created.

ACTIVITIES
1. Recount the story of Ymir.
2. Draw a detailed picture of either the world tree or Valhalla. Drawing pages are available at the end of the unit.
3. Compare and contrast the creation stories of Greek mythology and Germanic mythology.

ACTIVITIES ANSWER KEY
1. In order to gain control of the frost giant Ymir, the gods broke up his body and made the world of it. But this world was too cold to have life. So the gods took the sun, moon, and stars and put them in the sky of the world, to give it warmth and life.

3. In both mythologies, the world was created out of primordial chaos and darkness. The Germanic myths say how this came about, by the joining of primal cold and warmth. The Greek myths only say that it happened long ago, and began with the creation of life (Mother Earth), from the mutual love between the young earth and the sky.
